M&R Die and Tools

WE ARE

Manufacturer

Transforming raw materials into precision-engineered finished products, our **M&R Die and Tools** embody craftsmanship, innovation, and excellence at every stage of manufacturing.

We provide a total solution for the seamless pipe production industry by manufacturing high-quality parts for all types of machines, including piercing, pilger, drawbench, rotary, and more. Our comprehensive range of precision components supports reliable operation, high efficiency, and long-lasting performance across the entire production line.

ABOUT US!

At **M&R Die and Tools**, we focus on manufacturing according to your specifications, providing complete engineering solutions for smooth pipe production and various forms of precision job work. With a strong dedication to quality and excellence, we convert raw materials into finished products designed to meet the unique requirements of our clients.

Our Expertise

Comprehensive Job Work From raw material processing to delivering a finished product, we cover every step with meticulous attention to detail.

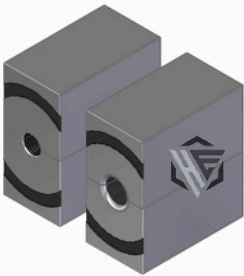

Why Choose Us?

Precision Engineering Our processes ensure every product meets exact specifications with the highest level of accuracy. We collaborate closely with our clients to deliver solutions that match their unique requirements.

PRODUCT OF DRAW

We are also producing the following draw batch product

 **T.C. DIE**

 **T.C. PLUG**

 **WPS PLUG**

 **TAPER SLEEVE**

We design and manufacture premium dies and plugs specifically for stainless steel pipe drawing, ensuring precision and performance.

M&R Die and Tools

PRODUCT OF PILGER DIE

M&R Die and Tools: Specialists in
Pilger Mill Die and Mandrels

A dedicated manufacturer of Pilger
Mill Die and Mandrels based in
India.

These tools are crucial for the cold
forming of steel pipes and tubes,
including those made from
stainless steel.

We fabricate Pilger Roll Dies and
Mandrels from high-quality
materials such as H13, which is
ideal for hard materials like
stainless steel.

All grooves are meticulously
machined using CNC machines to
guarantee exceptional quality and
durability.

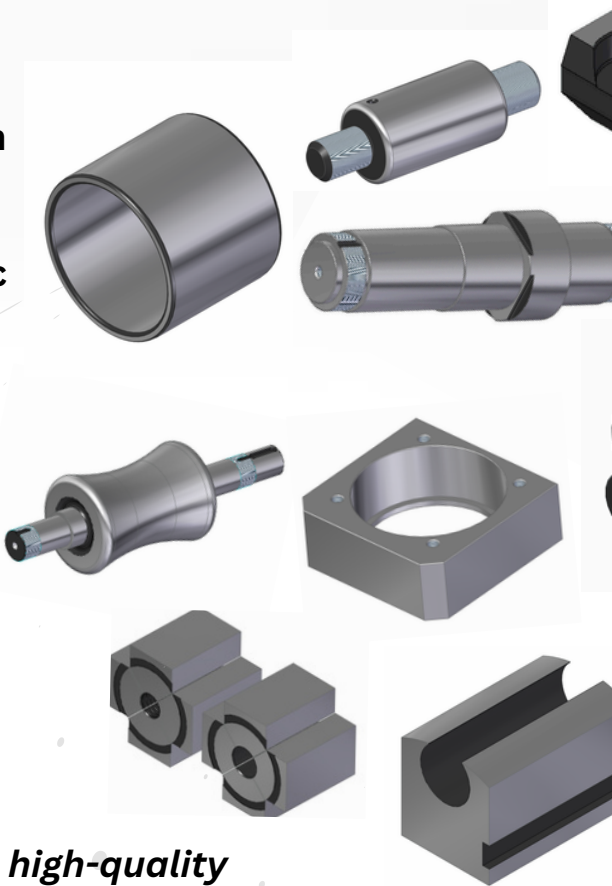

M&R Die and Tools

FEATURES OF PRODUCTS

- **High Precision:** Ensures accurate performance every time.
- **Durability:** Built to last, even under tough conditions.
- **Customization:** Made to suit your specific needs.
- **Top Quality:** Produced using advanced technology and the best materials
- **Versatility:** Useful for various industries like automotive, aerospace, and heavy machinery.

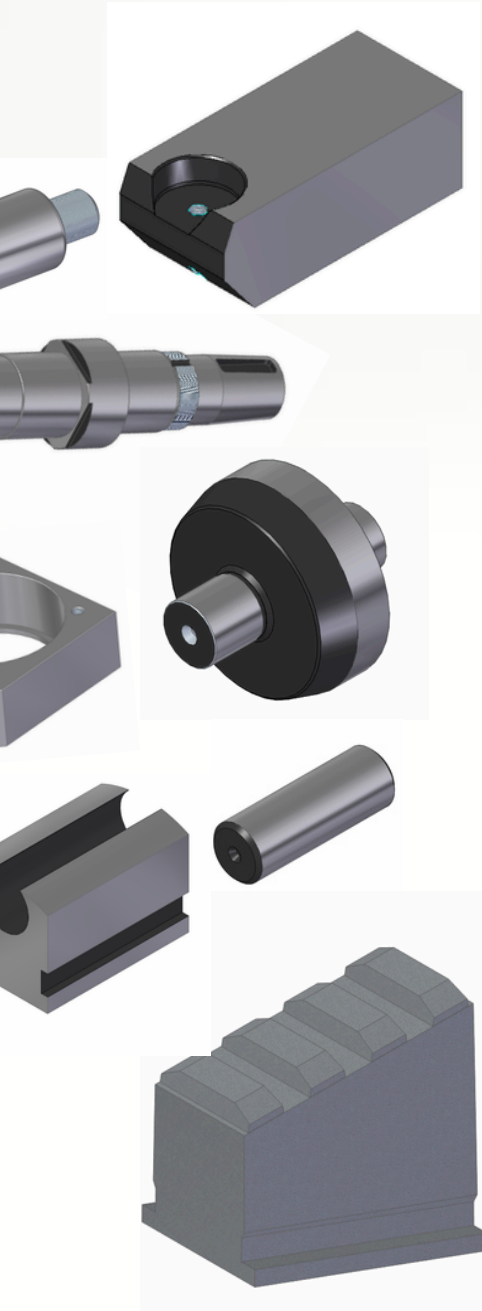

We are dedicated to providing simple yet high-quality solutions that help our customers achieve their goals. Our products are reliable, efficient, and made with a focus on quality and customer satisfaction.

OUR SPECIALITY

We transform customer samples into ready-to-use products by creating accurate drawings and manufacturing with precision. Our team works closely with customers to meet specific needs, ensuring reliable, durable, and high-quality solutions tailored to their requirements.

DEDICATED EXPERT TEAM

Drawing Expertise

With over 10 years of experience in Solid Edge and NX programming software, we excel in creating precise technical drawings, 3D models, and complex assemblies. Our expertise ensures accurate designs ready for production, meeting the highest industry standards.

CNC Turning Expertise

With over 5 years of experience, we specialize in precise CNC turning, optimizing programs for high efficiency and accuracy.

Lathe Operator Expertise

With over 10 years of experience, we specialize in operating manual and CNC lathes, ensuring precise machining and quality finishes.

Quality Expertise

With over 5 years of experience, we ensure strict quality control, performing detailed inspections to meet customer specifications and industry standards.

CAPACITY OF PRODUCTION

At M&R Die and Tools, we utilize a wide range of high-performance machines to deliver consistent quality and high-volume production across various tooling requirements. Here's a snapshot of our core machinery:

✦ CNC MACHINES

Precision turning, complex contouring parts

✦ VMC MACHINE

(Vertical Machining Center) – High-speed milling, die cavity shaping

✦ CYLINDRICAL GRINDING

Outer diameter precision finishing operation

✦ Surface Grinding

Flat surface ultra-fine finishing

✦ Lathe Machine

Basic turning, threading, facing tasks

✦ Special Purpose Machine (SPM)

High-volume, custom operation efficiency,
Specially for Making Die

We always use standard or customized machines tailored to our product requirements to ensure the best quality and maximum efficiency.
